

Rehydration of Ovoneve

Preparation to whipping of Ovoneve:
mix one part of product with some of the sugar.
Add 10 times Ovoneve's weight of water, better warm water, then whip normally.
The product can be hydrated using any non-fat liquid, as for instance strawberry's pulp or lemon juice if you want to obtain a fruit ice-cream cake!

Mix Ovoneve with some sugar.

Partially hydrate and whisk.

Stir in the rest of the water with a palette knife.

Keep whisking slowly until complete whipping.

Whip more in order to obtain a thicker mixture.

Hydration of Ovoneve with fruit pulp.
